Section 1

Before We Begin

This section discusses the required permissions you will need before you proceed with the installation process. Follow the instructions carefully to get started.

1.1 Required Permissions

You must have the necessary permissions before installing ShortPoint. These permissions are **Farm Administrator** and **Site Collection Administrator** for the site collection you are trying to install ShortPoint SPFx on.

1.1.1 Farm Administrator

You need to be a Farm Administrator to create and/or use an App Catalog. The App Catalog is where you will upload the ShortPoint SPFx file.

NOTE: *You can only check the list of Farm administrators if you are a Farm Administrator yourself. Contact your IT department to give you administrator access or to help you upload ShortPoint SPFx to the App Catalog.*

1.1.2 Site Collection Administrator

You need to be a Site Collection Administrator. To check, go to your SharePoint Admin Center and select **Active Sites** from the side panel.

The screenshot shows the SharePoint Admin Center interface. On the left, there is a navigation pane with various options like Home, Sites, Policies, Settings, Content services, Migration, Reports, Advanced, and More features. The 'Active sites' link is highlighted with a red box and a red arrow pointing to it. The main content area is titled 'Active sites' and contains a table with site information. The table columns include Site name, URL, Teams, Channel sites, Storage used (GB), and Primary admin. The table lists several sites: Apps, classic, Classic, Collaboration, Comms, Communication site, Magdalene, and Mags. Each site entry includes a 'More' button at the end.

Figure 1.1.2.1 Active Sites

Once there, select the Site Collection where you want ShortPoint to be installed. Under the **Permissions** tab, look for your name from the list of Site admins. If you are not listed, this means that you are not a Site Collection Administrator. Reach out to any of the administrators to grant you admin access.

The screenshot shows the 'Active sites' page with the 'Collaboration' site selected. A red box highlights the 'Permissions' tab in the top navigation bar of the modal. The 'Permissions' tab is selected, and the 'Site admins (1)' section shows 'FNU LNU' with a 'Manage' link. The modal also includes sections for 'General', 'Activity', 'Policies', and 'Microsoft 365 group owners'.

Figure 1.1.2.2 Permissions Tab

Section 2

Pre-Installation

This section details all the prerequisites you will need to install ShortPoint. There are six pre-installation steps in total. Follow them closely before proceeding to the installation section.

2.1 Submit the ShortPoint Trial Request

To access our trial page, go to <https://www.shortpoint.com/> and select **Install** at the top right corner.

Figure 2.1.1 Install button

Scroll down and click **SharePoint 2019**.

Figure 2.1.2 SharePoint 2019

Click **Download ShortPoint SPFx for SharePoint 2019 On-Premise**.

Figure 2.1.3 Download button

Fill in the necessary information. Just make sure that you choose the correct SharePoint environment (SharePoint 2019 (One-Premise)).

support.shortpoint.com

shortpoint.com

2.2 Extract the ShortPoint SPFx File

If you are using the Chrome browser, you will see a ZIP archive at the bottom of your screen after clicking the download button. If you are using another browser, look for the file in your downloads. Click the folder to open the file.

Figure 2.2.1 ShortPoint SPFx.zip file

You will see a `readme.txt`, a PDF installation guide, and the `shortpoint-spx.sppkg` file in the ZIP archive. Click the **shortpoint-spx.sppkg** file once to select it.

Figure 2.2.2 The shortpoint-spx.sppkg file

support@shortpoint.com

support.shortpoint.com

shortpoint.com

On the top, under Compressed Folder Tools, select the folder where you want the *shortpoint-spfx.sppkg* file to be extracted. This will extract the file to your selected folder.

Figure 2.2.3 Selecting a folder to extract the *shortpoint-spfx.sppkg* file

To make sure that the file is extracted properly, open the folder where you extracted the file and check if the *shortpoint-spfx.sppkg* file is there.

Figure 2.2.4 Checking the extracted *shortpoint-spfx.sppkg* file

2.3 Configure the Subscription Settings (Optional)

NOTE: This step is optional. If you have already configured the subscription settings, proceed to **Section 2.4**.

There are two parts you must accomplish to configure the subscription settings. They are configure subscription settings service application and configure app management service application.

2.3.1 Configure Subscription Setting Service Application

From your SharePoint Server 2019 farm, open **SharePoint 2019 Central Administration**.

Figure 2.3.1.1 SharePoint 2019 Central Administration

Select **System Settings** from the side panel.

Figure 2.3.1.2 System Settings button

Under Servers, click **Manage services in this farm**.

Figure 2.3.1.3 Manage services in this farm button

Click **Enable Auto Provision** for Microsoft SharePoint Foundation Subscription Settings Service.

| | | | |
|--|-----------|------------------------------|--|
| Managed Metadata Web Service | Yes | Manage Service Application | <input checked="" type="checkbox"/> Yes |
| Microsoft SharePoint Foundation Incoming E-Mail | No | Enable Auto Provision | <input checked="" type="checkbox"/> Yes |
| Microsoft SharePoint Foundation Subscription Settings Service | No | Enable Auto Provision | <input checked="" type="checkbox"/> Yes |
| Microsoft SharePoint Foundation Sandboxed Code Service | Yes | Disable Auto Provision | <input checked="" type="checkbox"/> Yes |
| Microsoft SharePoint Foundation Workflow Timer Service | Yes | Disable Auto Provision | <input checked="" type="checkbox"/> Yes |
| Microsoft SharePoint Insights | No | Enable Auto Provision | <input checked="" type="checkbox"/> Yes |
| PerformancePoint Service | Yes | Manage Service Application | <input checked="" type="checkbox"/> Yes |

Figure 2.3.1.4 Enable the Auto Provision button

Next, use the search bar to look for SharePoint 2019 Management Shell. Right-click on the app and select **Run as administrator**.

Figure 2.3.1.5 Run as administrator button

You will be redirected to **Administrator: SharePoint 2019 Management Shell**.

Figure 2.3.1.6 SharePoint 2019 Management Shell

Run the command below and hit **Enter** on your keyboard:

```
$sa = New-SPSubscriptionSettingsServiceApplication -ApplicationPool 'SharePoint Web Services Default' -Name 'Subscriptions Settings Service Application' -DatabaseName 'Subscription'
```

Figure 2.3.1.7 First SharePoint 2019 Management Shell command

support@shortpoint.com

support.shortpoint.com

shortpoint.com

Once done, you must verify if the subscription settings have been configured successfully. To do that, select **Application Management** from SharePoint 2019 Central Administration.

Figure 2.3.1.10 Application Management

Under Service Applications, click **Manage Service Applications**.

Figure 2.3.1.11 Manage service applications button

support@shortpoint.com

© Copyright 2026, ShortPoint Inc. All rights reserved

support.shortpoint.com

shortpoint.com

You should now see the **Subscription Settings Service Application** and the **Microsoft SharePoint Foundation Subscription Settings Service Application Proxy**.

| | | |
|---|---|---------|
| State Service | State Service | Started |
| Subscriptions Settings Service Application | Microsoft SharePoint Foundation Subscription Settings Service Application | Started |
| Microsoft SharePoint Foundation Subscription Settings Service Application Proxy | Microsoft SharePoint Foundation Subscription Settings Service Application Proxy | Started |
| Usage and Health data collection | Usage and Health Data Collection Service Application | Started |
| Usage and Health data collection | Usage and Health Data Collection Proxy | Started |

Figure 2.3.1.12 Subscription Setting Service Application

2.3.2 Configure App Management Service Application

Open the Windows launcher and use the search box to locate **SharePoint 2019 Central Administration**. Click it to open.

Figure 2.3.2.1 SharePoint 2019 Central Administration button

support@shortpoint.com

© Copyright 2026, ShortPoint Inc. All rights reserved

support.shortpoint.com

shortpoint.com

Select **Application Management** from the side panel.

Figure 2.3.2.2 Application Management

Under Service Applications, click **Manage service applications**.

Figure 2.3.2.3 Manage service applications button

On the Manage service applications page, click **New**.

Figure 2.3.2.4 New button

From the dropdown, choose **App Management Service**.

Figure 2.3.2.5 App Management Service button

Type a name for the service application in the **Service Application Name** box.

Figure 2.3.2.6 Service Application Name

Scroll down to see the Application Pool section. Choose **Use existing application pool** and from the drop-down, select **SharePoint Web Services Default**.

Figure 2.3.2.7 Application Pool section

support@shortpoint.com

support.shortpoint.com

shortpoint.com

To check if it is successfully created, go back to Manage service applications and look for **App Management Service Application** and **App Management Service Application Proxy**.

| | | |
|--|---|----------------|
| Access Services | Access Services Web Service Application | Started |
| Access Services | Access Services Web Service Application Proxy | Started |
| App Management Service | App Management Service Application | Started |
| App Management Service | App Management Service Application Proxy | Started |
| Application Discovery and Load Balancer Service Application | Application Discovery and Load Balancer Service Application | Started |
| Application Discovery and Load Balancer Service Application Proxy_538aeeec1-3330-49c7-9a24-5107f797fd1 | Application Discovery and Load Balancer Service Application Proxy | Started |

Figure 2.3.2.8 Application Management Service Application

And you're done! You can now proceed to the next section.

2.4 Setup SharePoint 2019 Farm App Catalog (SPFx)

Open the Windows launcher and use the search box to locate **SharePoint 2019 Central Administration**. Click it to open.

Figure 2.4.1 SharePoint 2019 Central Administration

Once there, select **Apps** from the side panel.

Figure 2.4.2 Apps button in the Sharepoint 2019 Central Administration

Under App Management, click **Manage App Catalog**.

Figure 2.4.3 Manage App Catalog button

support@shortpoint.com

© Copyright 2026, ShortPoint Inc. All rights reserved

support.shortpoint.com

shortpoint.com

On the Manage App Catalog page, select the **Create a new app catalog site** option and click **OK**.

Figure 2.4.4 Create a new app catalog site option

Select your **Web Application** from the drop-down and fill in the necessary details to create the App Catalog.

Below are the details you need to add:

| | |
|--|--|
| Title | This will serve as the name of your App Catalog Site Collection |
| Description | This will describe the purpose of your site. |
| URL | This contains the URL of the site. |
| Primary Site Collection Administrator | This will specify the user who will manage the App Catalog. Take note that only one user is allowed and security groups will not be permitted. |

Once you are done, click **Create**.

support@shortpoint.com

support.shortpoint.com

shortpoint.com

The screenshot shows the 'Create App Catalog' page in SharePoint Central Administration. The left sidebar lists various management options. The 'Web Application' section is active, showing a dropdown menu for selecting a web application. The 'Title and Description' section contains fields for 'Title' (set to 'Conundrum App Catalog') and 'Description'. The 'Web Site Address' section shows a URL path: 'http://.../sites/conundrumapps/_layouts/15/appcatalog.aspx'. The URL bar at the top also displays this path.

Figure 2.4.5 Create App Catalog page

To check if you have successfully created the App Catalog, select **Apps** again from the side panel.

The screenshot shows the 'Application Management' page in SharePoint Central Administration. The left sidebar lists various management options, with 'Apps' highlighted by a red box and an arrow pointing to it. The main content area shows sections for 'Web Applications', 'Site Collections', 'Service Applications', and 'Databases'.

Figure 2.4.6 Apps button in the Sharepoint 2019 Central Administration

Then, click **Manage App Catalog**.

Figure 2.4.7 Manage App Catalog button

You will now be able to see your App Catalog site details on the Manage App Catalog page.

Figure 2.4.8 App Catalog site details

NOTE: Make sure that you have the English language pack installed. (You don't need to have a site created with this language pack. It just needs to be installed for ShortPoint to work correctly).

support.shortpoint.com

shortpoint.com

2.5 Enable Scripting Capabilities with Powershell (Optional)

By default, scripting capabilities are not enabled for modern and classic pages. To enable scripting capabilities, you must use **SharePoint 2019 Management Shell**. You must also have access to your **SharePoint Farm Server** and you need to be a **Farm Server Administrator**.

First, use the search box to look for **SharePoint 2019 Management Shell**. Right-click on the app and select **Run as administrator**.

Figure 2.5.1 Run Administrator button

A pop-up window will appear asking you if you want to allow the app to make changes to your device. Click **Yes**.

Figure 2.5.2 Yes button User Account Control

You will be redirected to Administrator: SharePoint 2019 Management Shell.

Figure 2.5.3 SharePoint 2019 Management Shell

support@shortpoint.com

© Copyright 2026, ShortPoint Inc. All rights reserved

support.shortpoint.com

shortpoint.com

Type the command below to enable scripting capabilities:

```
(Get-SPSite-Identity"https://your-host/sites/modern-site").DenyPermissionsMask=[Microsoft.SharePoint.SPBasePermissions]::EmptyMask
```

Replace **your-host** with your hostname.

Replace **modern-site** with the path of your modern site.

For example:

```
(Get-SPSite-Identity"https://shortpoint2019/sites/portal").DenyPermissionsMask=[Microsoft.SharePoint.SPBasePermissions]::EmptyMask
```

After typing this command, hit **Enter** using your keyboard.

Figure 2.5.4 SharePoint 2019 Management Shell command

Then, to prevent SharePoint from resetting custom script settings to its original value, run the following command in PowerShell:

```
Set-SPOTenant -DelayDenyAddAndCustomizePagesEnforcement $True
```

That's it! You now have scripting capabilities enabled.

support.shortpoint.com

shortpoint.com

2.6 Enable IIS 6 Metabase Compatibility

There are two ways to configure IIS 6 Metabase Compatibility in your environment. One is through Windows PowerShell and the other is through Windows Server Manager. Select the option that you are most familiar and comfortable with.

2.6.1 Option 1: Enable IIS 6 Metabase Compatibility with PowerShell

Look for the **Windows PowerShell** application through the search box on your Windows taskbar. Right-click on the app and select **Run as an administrator**.

Figure 2.6.1.1 Run Administrator button

A PowerShell administrator window will appear. Type the command **import-module servermanager** and hit **Enter**.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) 2016 Microsoft Corporation. All rights reserved.

PS C:\Windows\system32> import-module servermanager
PS C:\Windows\system32> -
```

Figure 2.6.1.2 import-module servermanager command

Then, type the command **install-windowsfeature web-metabase** and press **Enter** to complete the process.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) 2016 Microsoft Corporation. All rights reserved.

PS C:\Windows\system32> import-module servermanager
PS C:\Windows\system32> install-windowsfeature web-metabase
```

Figure 2.6.1.3 install-windowsfeature web-metabase command

Once completed, you may proceed to **Section 3.1** of this guide.

2.6.2 Option 2: Enable IIS 6 Metabase Compatibility using Windows Server Manager

Open the **Windows Start Menu**, select **Administrative Tools**, and open **Server Manager**.

Figure 2.6.2.1 Server Manager

On the top left portion of the Servers Manager window, you will find a navigation pane. Click **Manage** and select **Add Roles and features** from the dropdown to launch the wizard window.

Figure 2.6.2.2 Add Roles and Features

On the Add Roles and Features wizard, hit the **Next** button until you reach the **Server Roles** options. In the *Select Role Services* pane, scroll down to the **Web Server IIS** section, expand *Management Tools*, and select the tick box to enable **IIS 6 Management Compatibility**. Also, select to enable all its sub-features.

Figure 2.6.2.3 Server Roles options

Click **Next** on the succeeding windows until you reach the *Confirm Installations Selections* pane and press **Install**. Once the installation is complete, you click **Close**.

Congratulations, you now have IIS 6 Metabase Compatibility enabled in your environment. You may now proceed to **Section 3.1** of this guide.

Section 3

Installing ShortPoint SPFx

This section walks you through the steps of installing ShortPoint. There are three major steps: uploading ShortPoint SPFx to the tenant app catalog, adding ShortPoint SPFx to SharePoint sites, and running ShortPoint installation from Dashboard.

3.1 Upload ShortPoint SPFx to the App Catalog

Open the Windows launcher and use the search box to locate **SharePoint 2019 Central Administration**. Click it to open.

Figure 3.1.1 SharePoint 2019 Central Administration

Once there, select **Apps** from the side panel.

Figure 3.1.2 Apps button

Under App Management, click **Manage App Catalog**.

support.shortpoint.com

shortpoint.com

You will also see ShortPoint SPFx in your App Catalog. Make sure that you see **Yes** under the Deployed column to ensure that it has been deployed successfully.

The screenshot shows the SharePoint App Catalog interface. At the top, there is a green banner indicating "Upload completed (1 added) Refresh". Below the banner, there are buttons for "New", "Upload", "Sync", "Share", and "More". The "All Apps" tab is selected. A search bar with the placeholder "Find a file" and a magnifying glass icon is present. The table below lists the deployed app:

| Product ID | Title | Name | App Version | Edit | Product ID | Metadata Language | Default Metadata Language | Modified | Enabled | Valid App Package | Deployed | App Package Error Message |
|---|-----------------|-----------------|-------------|----------|--|-------------------|---------------------------|-------------------|---------|-------------------|----------|---------------------------|
| # Product ID : (471EABD2-E54F-4F6C-81BE-996281923395) (1) | ShortPoint SPFx | shortpoint-spfx | ... | 7.1.5.38 | (471EABD2-E54F-4F6C-81BE-996281923395) | English - 1033 | Yes | A few seconds ago | Yes | Yes | Yes | No errors. |

A red box highlights the "Deployed" column for the ShortPoint SPFx app, which shows "Yes".

Figure 3.1.11 Deployed successfully

3.2 Add ShortPoint SPFx to Site Contents

Open the site you want to install ShortPoint SPFx on. Click the **cog wheel** in the Suite Bar and choose **Site Contents** from the drop-down.

The screenshot shows a SharePoint site page titled "Installing ShortPoint SPFx" in a "Private group". The left navigation bar includes "Search this site", "Home", "Conversations", "Documents", "Notebook", "Pages", "Site contents", "Recycle bin", and "Edit". The main content area displays a "News" section with a "New" button. On the right, a context menu is open, showing options: "Office 365 settings", "Add a page", "Add an app", "Site contents" (which is highlighted with a red box and has a red arrow pointing to it), "Site information", "Site permissions", and "Change the look". At the bottom, there are buttons for "Add News", "Get the mobile app", and "Feedback".

Figure 3.2.1 Site contents button

NOTE: The features you can access in ShortPoint depend on the license you have (Trial, Lite, Pro, or Enterprise). For more information, check out [Licensing Options](#).

Section 4

Post-Installation

This section discusses license activation, a process you need to do to activate your trial license or if you have purchased a license from ShortPoint.

License Activation

Activation is needed for both trial and full licenses. It also needs to be done after license renewal.

Assigning users, on the other hand, is needed only in case you've purchased the *full license (Lite, Pro, or Enterprise)* or are *renewing* one. If you are on *Trial*, all users with edit permissions are able to try ShortPoint on the site where it is installed.

To activate the ShortPoint SPFx license, you need to go to **Site Contents**, locate **ShortPoint Dashboard**, and click **Licensing**.

Figure 4.1.1 Licensing button in the ShortPoint Dashboard

If you signed up for the trial license or have purchased a license (Lite, Pro, or Enterprise), you will see that a new license is available. Click **Activate**.

Figure 4.1.2 Activate button

If you are on a trial license, you will see that your License Status is Active - Trial. It will show you how many days are left for your trial, and you will also have the option to buy a license.

Alternatively, if you have purchased a license (Lite, Pro “OnDemand”, or Enterprise “OnDemand”), you will see that you are on Active - OnDemand License. The number of days left before renewal will also appear.

Figure 4.1.4 Active - OnDemand License Status

If it is your first time purchasing an OnDemand license, you will also need to assign ShortPoint Designers to accounts from your environment. Simply type the name of the designer on the search box and click **Save Changes**.

Figure 4.1.5 Assigning ShortPoint Designers

NOTE: You may only change the ShortPoint Designer and assign it to someone else once a year. For further assistance, you may reach out to support@shortpoint.com.

That's it! You now have ShortPoint installed.
